**2. SUMMARY OF SIGNIFICANT ACCOUNTING
POLICIES (continued)**

b. Principles of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiary.

A subsidiary is an entity (including structured entities) over which the Company has control. The Company controls an entity when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiary is fully consolidated from the date on which control is transferred to the Company. It is de-consolidated from the date on which that control ceases.

All material intercompany transactions, balances, unrealised gains and losses on transactions between Group companies are eliminated.

The accounting policies adopted in preparing the consolidated financial statements have been consistently applied by the subsidiary.

The Group recognises any non-controlling interest at the non-controlling interest's proportionate share of the acquiree's net assets. Non-controlling interest is reported as equity in the consolidated statement of financial position, separate from the owner of the parent's equity.

f. Penurunan nilai aset keuangan

Pada akhir setiap periode pelaporan, Grup menilai apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan telah mengalami penurunan nilai. Aset keuangan atau kelompok aset keuangan diturunkan nilainya dan kerugian atas penurunan nilai terjadi hanya jika terdapat bukti objektif bahwa penurunan nilai merupakan akibat dari satu atau lebih peristiwa yang terjadi setelah pengakuan awal aset ("peristiwa kerugian") dan peristiwa (atau peristiwa-peristiwa) kerugian tersebut memiliki dampak pada estimasi arus kas masa datang atas aset keuangan atau kelompok aset keuangan yang dapat diestimasi secara andal.

f. Impairment of financial assets

At the end of each reporting period, the Group assesses whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

g. Kas dan setara kas

Kas dan setara kas mencakup kas, simpanan pada bank yang sewaktu-waktu dapat dicairkan dan investasi likuid jangka pendek lainnya dengan jangka waktu jatuh tempo tiga bulan atau kurang.

g. Cash and cash equivalents

Cash and cash equivalents which are restricted in use, are presented in the consolidated statement of financial position as "restricted cash and cash equivalents" in the non-current assets.

h. Piutang usaha dan piutang lain-lain

Piutang usaha dan piutang lain-lain pada awalnya diakui sebesar nilai wajar dan selanjutnya diukur pada biaya perolehan diamortisasi dengan menggunakan metode bunga efektif, kecuali efek diskontonya tidak material, setelah dikurangi provisi untuk penurunan nilai piutang.

Provisi untuk penurunan nilai piutang dibentuk pada saat terdapat bukti obyektif bahwa saldo piutang tidak dapat ditagih. Piutang ragu-ragu dihapuskan pada saat piutang tersebut tidak tertagih.

h. Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, except where the effect of discounting would be immaterial, less provision for receivable impairment.

Provision for receivable impairment is established when there is objective evidence that the outstanding amounts will not be collected. Doubtful accounts are written-off during the period in which they are determined to be not collectible.

x. Selisih nilai transaksi restrukturisasi entitas sepengendali

Transaksi restrukturisasi entitas sepengendali adalah transaksi yang mengalihkan aset, liabilitas, saham dan instrumen kepemilikan lainnya diantara entitas sepengendali yang tidak menimbulkan laba atau rugi bagi seluruh kelompok perusahaan ataupun entitas individual dalam kelompok perusahaan tersebut.

Karena transaksi restrukturisasi entitas sepengendali tidak mengakibatkan perubahan substansi ekonomi kepemilikan lainnya yang dipertukarkan, maka aset maupun liabilitas yang kepemilikannya dialihkan harus dicatat sesuai dengan nilai buku seperti penggabungan usaha berdasarkan metode penyatuan kepemilikan (*pooling of interest*).

Selisih antara harga pengalihan dengan nilai buku sehubungan dengan restrukturisasi entitas sepengendali bukan merupakan *goodwill* melainkan dicatat sebagai akun "Tambahkan Modal Disetor" dan disajikan sebagai bagian dari ekuitas pada laporan posisi keuangan konsolidasian.

y. Dividen

Pembagian dividen kepada para pemegang saham Perusahaan diakui sebagai sebuah liabilitas dalam laporan keuangan konsolidasian pada periode ketika dividen tersebut disetujui oleh para pemegang saham Perusahaan.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

x. Difference in value from restructuring transactions among entities under common control

Restructuring transactions of entities under common control are transactions to transfer assets, liabilities, shares and other ownership instruments between parties under the same control which do not result in profit or loss for the whole group or for an individual entity of the group.

Since a transaction between entities under common control does not change the economic substance of ownership of the other instruments that are exchanged, both assets and liabilities, the ownership of which is transferred, should be recognised at book value in the same manner as a business combination that is accounted for by use of the pooling of interest method.

The difference between the transfer price and the book value arising from restructuring transactions of entities under common control is not goodwill, but it should be recorded under the account "Additional Paid in Capital" and presented as a component of the equity section in the consolidated statement of financial position.

y. Dividend

Dividend distribution to the Company's shareholders is recognised as a liability in the consolidated financial statements in the period in which the dividends are approved by the Company's shareholders.

3. ESTIMASI AKUNTANSI YANG PENTING

Estimasi terus dievaluasi berdasarkan pengalaman historis dan faktor-faktor lain, termasuk ekspektasi peristiwa masa depan yang diyakini wajar berdasarkan kondisi yang ada. Hasil aktual dapat berbeda dengan jumlah yang diestimasi. Estimasi dan asumsi yang memiliki pengaruh signifikan terhadap jumlah tercatat aset dan liabilitas diungkapkan di bawah ini.

Imbalan kerja

Nilai kini dari kewajiban imbalan pasti tergantung pada sejumlah faktor yang ditentukan berdasarkan basis aktuarial dengan menggunakan sejumlah asumsi. Asumsi yang digunakan dalam menentukan biaya untuk imbalan pensiun termasuk tingkat diskonto dan kenaikan gaji di masa datang. Setiap perubahan dalam asumsi ini akan berdampak pada nilai tercatat atas kewajiban imbalan pensiun.

Grup menentukan tingkat diskonto dan tingkat kenaikan gaji di masa datang yang sesuai pada akhir periode pelaporan. Dalam menentukan tingkat suku bunga yang sesuai, Grup mempertimbangkan tingkat suku bunga obligasi pemerintah yang didenominasikan dalam mata uang dimana imbalan akan dibayar dan memiliki jangka waktu yang serupa dengan jangka waktu liabilitas terkait. Dalam menentukan tingkat kenaikan gaji masa datang, Grup mengumpulkan data historis mengenai perubahan gaji dasar pekerja dan menyesuaikannya dengan perencanaan bisnis masa datang.

Asumsi kunci lainnya untuk kewajiban pensiun sebagian didasarkan pada kondisi pasar saat ini. Informasi tambahan diungkapkan dalam Catatan 20.

Penghasilan tangguhan

Perusahaan membuat estimasi penghasilan tangguhan atas kartu poin loyalitas milik pelanggan yang diterbitkan oleh Perusahaan. Kartu ini memperbolehkan pelanggan untuk memperoleh poin untuk setiap transaksi pembelian di gerai. Poin tersebut dapat ditukarkan dengan kupon yang dapat digunakan untuk membeli barang dagangan Perusahaan.

3. CRITICAL ACCOUNTING ESTIMATES

Estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and assumptions that have a significant effect on the carrying amounts of assets and liabilities are disclosed below.

Employee Benefits

The present value of the defined benefit obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the cost for retirement benefits include the discount rate and future salary increment rate. Any changes in these assumptions will affect the carrying amount of retirement benefits obligations.

The Group determines the discount rate and future salary increment rate at the end of each reporting period. In determining the appropriate discount rate, the Group considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related post-employment benefit obligation. In determining the future salary increment rate, the Group collects all historical data relating to changes in base salaries and adjusts it for future business plans.

Other key assumptions for retirement benefits obligations are based in part on current market conditions. Additional information is disclosed in Note 20.

Deferred income

The Company made deferred income estimation on loyalty point card owned by customers issued by the Company. This card allowed the customer to earn points from each purchase transaction in store. This point can be redeemed to get a coupon which can be used to purchase the Company's merchandise.

**3. ESTIMASI AKUNTANSI YANG PENTING
(lanjutan)**

Penghasilan tangguhan (lanjutan)

Perhitungan atas penghasilan tangguhan tersebut melibatkan estimasi tingkat pertukaran konversi berdasarkan pertukaran aktual historis atas poin tersebut. Ketidakpastian yang terkait dengan faktor tersebut dapat menghasilkan jumlah akhir yang dapat direalisasi berbeda dengan jumlah tercatat penghasilan tangguhan yang dilaporkan.

**3. CRITICAL ACCOUNTING ESTIMATES
(continued)**

Deferred income (continued)

The calculation of this deferred income involves estimating the redemption rate based on historical actual redemption of the point conversion. Uncertainty associated with these factors may result in the ultimate realisable amount being different from the reported carrying amount of deferred income.

Melalui program imbalan pasti yang dimiliki oleh Grup, Grup terpengaruh oleh beberapa risiko sebagai berikut:

Through its defined benefit pension plans, the Group is exposed to a number of risks, which are detailed below:

- a. Risiko suku bunga. Kewajiban imbalan pasti yang dihitung berdasarkan PSAK 24 menggunakan tingkat diskonto obligasi. Jika tingkat diskonto tersebut turun, maka kewajiban imbalan pasti akan cenderung mengalami kenaikan.
- b. Risiko inflasi atas gaji. Kenaikan aktual atas inflasi dibandingkan dengan tingkat kenaikan gaji akan membuat kewajiban imbalan pasti menjadi lebih tinggi.

- a. *Interest rate risk. The defined benefit obligation calculated under SFAS 24 uses a discount rate on bond yields. If bond yields fall, the defined benefit will tend to increase.*
- b. *Salary inflation risk. Higher actual increase than expected increase in salary will increase the defined benefit obligation.*

Sensitivitas dari kewajiban imbalan pasti terhadap perubahan asumsi aktuarial utama adalah sebagai berikut:

The sensitivity of the defined benefit obligation to changes in the principal assumptions is as follows:

| | Dampak atas kewajiban imbalan pasti/ Impact on defined benefit obligation | | | |
|-------------------------------------|--|--|---|---------------------------|
| | Perubahan asumsi/ Change in assumption | Kenaikan asumsi/ Increase in assumption | Penurunan asumsi/ Decrease in assumption | |
| Tingkat diskonto | 1% | Penurunan sebesar/ Decrease by 7.4% | Kenaikan sebesar/ Increase by 8.4% | <i>Discount rate</i> |
| Tingkat kenaikan gaji di masa depan | 1% | Kenaikan sebesar/ Increase by 8.5% | Penurunan sebesar/ Decrease by 7.6% | <i>Salary growth rate</i> |

Analisis sensitivitas di atas didasarkan pada perubahan atas asumsi tunggal dengan asumsi lainnya konstan. Pada praktiknya, kecil kemungkinan hal tersebut terjadi, dan perubahan-perubahan dalam beberapa asumsi mungkin saling berhubungan. Ketika melakukan perhitungan sensitivitas dari kewajiban imbalan pasti ke asumsi aktuarial yang signifikan, metode yang sama (nilai kini dari kewajiban imbalan pasti yang dihitung dengan menggunakan metode *projected unit credit* pada akhir periode pelaporan) telah diterapkan seperti saat menghitung kewajiban pensiun yang diakui pada laporan posisi keuangan konsolidasian.

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the consolidated statement of financial position.

Durasi rata-rata tertimbang dari kewajiban imbalan pasti pada tanggal 31 Desember 2018 adalah 11,76 tahun (31 Desember 2017: 12,82 tahun).

The weighted average duration of the defined benefit obligation as at 31 December 2018 is 11.76 years (31 December 2017: 12.82 years).
